Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6-9, drawn to a metal air cell, classified in class 429, subclass 27.
 - II. Claims 10-17, drawn to a rechargeable nickel/zinc and nickel/iron cell, classified in class 429, subclass 72.
2. The inventions are distinct, each from the other because of the following reasons: the above groups comprise materially different electrode materials and battery makeup and so the two groups are distinct. For example, Group II includes an electrode with a fixed amount of material unlike the air electrode of Group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Thursday from 6:15-3:45.
